Создаём кнопку

```
<Button
    android:id="@+id/btn_1"
    android:layout_width="275dp"
    android:layout_height="53dp"
    android:layout_marginStart="68dp"
    android:text="@string/str3"
    app:layout_constraintBottom_toBottomOf="parent"
    app:layout_constraintStart_toStartOf="parent"
    app:layout_constraintTop_toBottomOf="@+id/tv_Hello"
    app:layout_constraintVertical_bias="0.382" />
```

Дальше создаём activitymain 2

```kotlin
package com.example.myapplication111

import ...

class MainActivity : AppCompatActivity() {
    override fun onCreate(savedInstanceState: Bundle?) {
        super.onCreate(savedInstanceState)
        this.enableEdgeToEdge()
        setContentView(R.layout.activity_main)
        ViewCompat.setOnApplyWindowInsetsListener(findViewById<View>(R.id.main))
        { v: View, insets: WindowInsetsCompat ->
            val systemBars = insets.getInsets(WindowInsetsCompat.Type.systemBars())
            v.setPadding(systemBars.left, systemBars.top, systemBars.right, systemBars.bottom)
            insets
        }
        val btn : Button = findViewById(R.id.btn_1)

        btn.setOnClickListener{

            val intent = Intent( packageContext: this, MainActivity2::class.java)
            startActivity(intent)
        }
    }
}
```

```kotlin
1   package com.example.myapplication111
2
3   import ...
8
9   class MainActivity2 : AppCompatActivity() {
10      override fun onCreate(savedInstanceState: Bundle?) {
11          super.onCreate(savedInstanceState)
12          enableEdgeToEdge()
13          setContentView(R.layout.activity_main2)
14          ViewCompat.setOnApplyWindowInsetsListener(findViewById(R.id.main)) { v, insets ->
15              val systemBars = insets.getInsets(WindowInsetsCompat.Type.systemBars())
16              v.setPadding(systemBars.left, systemBars.top, systemBars.right, systemBars.bottom)
17              insets
18          }
19      }
20  }
```

Создаём задний фон на втором экране

```xml
<?xml version="1.0" encoding="utf-8"?>
<androidx.constraintlayout.widget.ConstraintLayout xmlns:android="http://s
    xmlns:app="http://schemas.android.com/apk/res-auto"
    xmlns:tools="http://schemas.android.com/tools"
    android:id="@+id/main"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    tools:context=".MainActivity2">
    <EditText
        android:layout_width="443dp"
        android:layout_height="750dp"
        android:id="@+id/editText"
        android:layout_gravity="center"
        android:background="@drawable/fon2"/>
</androidx.constraintlayout.widget.ConstraintLayout>
```

Итог
